

Type E2, F2, U2

Feature size

Outside diameter: ϕ 20, 25, 30, 35, 40mm

Hot Zone max. Length: 1000mm

Cold End max. Length: 500mm

Size of Types E, F and U are available in the above range.

Electric conditions

Same as that of the same size of Types E, F and U.

Identification Method

Identify by the following method as Types E, F and U are not identifiable by appearance.

- Type E2 and F2 have slits on their end surface.

- Type U2 has a slit at the center of the crossbar.

Caution:

As their temperature rise is slightly different from that of other general heating elements, do not use them by combining with Types E, F or U in the same circuit.
